

## Quebec 4-H

### Attestation for 4-H In person Programming during the COVID-19 pandemic

4-H is dedicated to providing a safe and inclusive learning environment that allows for universal access and participation. As part of providing a safe and healthy environment for youth, 4-H is required to comply with local health and venue requirements that requires all, participants/volunteer leaders and guests that are eligible for vaccination, to be fully vaccinated against COVID-19, subject only to legitimate narrow exemptions under human rights legislation.

4-H Quebec policy on in person programming and vaccination is:

In this attestation, “*fully vaccinated against COVID-19*” means you have received the full series of a vaccine authorized in Canada at least 14 days ago\*(Consult Quebec’s definition of fully vaccinated. Presently, children under the age of 12 are not required to be vaccinated. However, this status may change according to future government guidelines.

I affirm that my answer provided below is true and correct to the best of my knowledge and belief. I understand that any misrepresentation or falsification of this Attestation would be dishonest and would constitute a violation of the Code of Conduct for 4-H in Canada.

As Quebec 4-H returns to in-person programming in 2022 Please note that all volunteers/participants/guests attending in-person 4-H activities are required to attest to being fully vaccinated\* against COVID-19.

- Yes. I have read the above and hereby confirm my COVID-19 vaccination status as fully vaccinated against COVID-19.
- No. I am not fully vaccinated against COVID-19. I understand 4-H is unable to grant permission to attend
- I would like to discuss if virtual options are available
